Design(er) Insight: Given the demand for more diverse, economically flexible developments, mixed-use has emerged as a viable alternative to stand-alone single use building sites. For over ten years, Laguarda.Low has unraveled complex building programs in a variety of urban environments around the world. We have perfected the ins and outs of combining retail, office, hospitality, residential and cultural uses to allow for future flexibility, enhance the public realm and provide a tactile human experience.

OCT Bay

A mixed-use immersive entertainment and retail destination along a pristine, lake-front site. Read the full design story [here](#).
